For a full list of keyboard shortcuts click here . This is a list of the toolkits key functions that some users don't know about or just think that they are not cool enough to be used... But they are great! Just imagine the time you'll save by using them... I think all of them are quite useful. SanDisk Sansa e200 Toolkit features: In this article I will not be concentrating on how to set up or configure the tools available in the toolkits, as this is a very well documented process. Instead, I will talk about some of my favorite features and show what they can do... but first a little tip for those who have not yet figured out the best way to use Excel Toolkits:

I will just say that I wanted to show you here few of my favorite tips and tricks. Here is a complete list of all keyboard shortcuts that you can find at Microsoft's website: <http://office.microsoft.com/en-us/excel-help/keyboard-shortcuts-for-excel-2010-HP005173223.aspx> I do not own or recommend tools that will enable you to break the Terms of Service of Microsoft. I just decided to make a toolkit for those who really need it, but cannot afford it. I also created a toolkit for Microsoft Word 2010, which comes without any additional features, except for the Reset Password Tool. I noticed that some users enjoy my toolkits and use them on a daily basis... some others do not know how to use them properly, as they were never been introduced with their features.
